

Dear Commissioners:

I urge you not eliminate controls on the number of media outlets (TV, radio, and print) that can be owned by a single corporation in a specific market. Elimination on these controls will limit competition and diversity of the media. Those who control the media will also control the content of news and other programming. In smaller markets such as the Oklahoma City area, the diversity of programming and media will be further reduced. This is not in the public interest, an area that the FCC is required to protect.

Sincerely,

Howard Saxion, Ph.D.
